## DECO & QUADEC PROFILES & REMA

REVISION: MARCH 2019

Website: [www.eurotile.ca](http://www.eurotile.ca)

### DECO PROFILE

SUGGESTED  
LIST PRICE

#### SC-E125D DECO - STAINLESS STEEL: 1/2"

Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet.

The profile is available in stainless steel, solid brass, chrome-plated solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" (6 mm)-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc.

The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation "R" so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.

\$49.84 EA

### QUADEC PROFILE

SUGGESTED  
LIST PRICE

#### SC-Q60AE QUADEC PROFILE- SATIN ANODIZED ALUMINUM: 1/4"

Schluter-QUADEC is a finishing and edge-protection profile for the outside corners of tiled surfaces. It features a trapezoid-perforated anchoring leg that is secured in the mortar bond coat beneath the tile and a reveal that forms a square outer corner along the surface edge. In addition, Schluter-QUADEC is suitable for transitions, corners, or dado coverings with other covering materials; for example, carpet, parquet, natural stone tiles, or poured epoxy coverings. The integrated joint spacer forms a defined joint cavity with the tile.

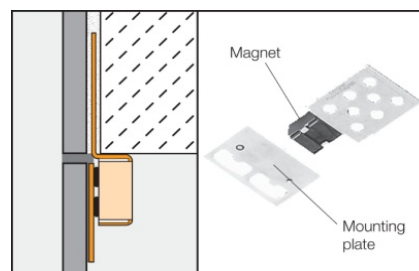

\$17.08 EA

### REMA ACCESS PANELS

SUGGESTED  
LIST PRICE

#### REMA TILE MAGNET AND COUNTER PLATE (4 PCE SET)

Schluter®-REMA is the ideal system for creating concealed access panels in tiled wall coverings. REMA's installation is independent of tile size and thickness and enables exact matching of the access panel to the overall joint design. Thus, panels that access electrical or plumbing components do not impair the visual appearance of the tile covering.

<b>DIA-CT850-125</b>	CARPET TRANSITION PROFILE - SATIN NICKEL ANODIZED: 12.5MM (1/2")	\$23.95 EA

The specificity of this moulding is to facilitate the juxtaposition from a ceramic tile surface to a carpeted area. This trim allows you the possibility to insert the carpet in a way to avoid the fraying out of the chosen floor covering. So, it increases the efficiency and durability of your work. A fine way to join practical and esthetically good looking results.

## T SHAPED PROFILES

		SUGGESTED LIST PRICE
<b>DIA-TT222</b>	T SHAPE PROFILE - SATIN ANODIZED: 20MM (13/16")	\$10.50 EA
<b>DIA-TT850</b>	T SHAPE PROFILE - SATIN NICKEL ANODIZED: 20MM (13/16")	\$12.85 EA

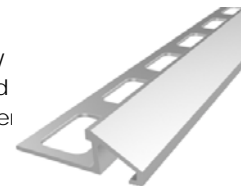

Their primary use is to create a joint cover between two floor surfaces of the same height already installed where expansion is expected. The curved end on each side of this profile has been designed to create a transition between the two floors if they are not perfectly the same height. This avoids creating an empty space between the trim and the floor. Often used to separate two rooms or to delimit two floors for example hardwood and ceramic.

<b>DIA-TR850-125</b>	TRANSITION PROFILE - SATIN NICKEL ANODIZED: 12.5MM (1/2")	\$22.50 EA

Coming really handy when renovating, these transition profiles are conceived to realize a slope of 30 degrees between a ceramic surface and another surface of an inferior level by creating a smooth transition. Also ideal for transitions from ceramic tile coverings to finished surface. An angle of 90 degrees at the end of the slope will allow the meeting with a thinner revetment: like a carpet, a wood floor or a vinyl surface.

**\$17.50 EA**  
**\$18.50 EA**

Coming really handy when renovating, or working on any other ceramic tile installations project, our rounded transition mouldings are conceived to realize a bullnose effect between a ceramic surface and another surface of an inferior level. These quarter circle trims are an outstanding protective and decorative edge for wall and countertop tile applications.

**DIA-ECRD222-80** ECONOMY ROUND TRANSITION PROFILE - SATIN ANODIZED: 8MM (5/16")  
**DIA-ECRD222-100** ECONOMY ROUND TRANSITION PROFILE - SATIN ANODIZED: 10MM (3/8")

Schluter-KERDI-BOARD is a multifunctional tile substrate and building panel, which can be used for creating bonded waterproofing assemblies with tile coverings. It consists of an extruded polystyrene foam panel, with a special reinforcement material on both sides and fleece webbing for effective anchoring in thin-set mortar. The boards are simply cut to size with a utility knife. The gridlines, which are printed on the surface, are helpful for neat and quick cuts and installation. Tiles can be installed directly over KERDI-BOARD using the thin-set method.
